

SeraCare Global Patient Sample (GPS) Program

Your access to a vast and evolving inventory of single test, patient samples, developed in partnership with the world's largest reference laboratories

Delivery of patient samples, when you need them and the way you need them, to keep your research initiatives on track. **That's SeraCare.**

Fifty thousand new samples available per day. Two thousand test parameters. At your fingertips

Features and Benefits

- Proprietary and searchable database of test parameters and patient samples
 - Step 1** Communicate the parameters that meet your research requirements—type of test, and if applicable, gender and age of patient
 - Step 2** SeraCare GPS program provides a list of samples matching your parameters
 - Step 3** Choose from our provided list and samples can be delivered on your schedule
- More than 2,000 test parameters to select from, including
 - Infectious disease: serology, molecular biology, virology
 - Allergy and autoimmune
 - Genetics and cytogenetics: including pre- and post natal
 - Oncology and onco-hematology
 - Endocrinology: metabolic tests, serum and urine
 - Pharmacology, toxicology, vitaminology, specialized biochemistry
- Extensive and evolving inventory, including rare and difficult to source material
 - Fifty thousand new, remnant samples available per day—including serum, urine, cerebrospinal and amniotic fluids
 - A continuous supply to meet your expected and ongoing sample needs
- Samples are anonymized remnants, suitable for use in research and clinical trials
- Small volumes—ideal for building large panels requiring a range of test results
 - Sample sizes available: 1 mL serum, 10 mL urine, 0.5 mL cerebrospinal fluid (CSF), 1 mL amniotic fluid
- Clinical data are available for purchase and delivery with most samples

Communicate your single test patient sample requirements.

SeraCare GPS will match your requirements against a database of millions of samples.

You choose from the matched list we provide. Simple as that

SeraCare Global Patient Sample (GPS) Program

Your access to a vast and evolving inventory of single test, patient samples, developed in partnership with the world's largest reference laboratories

Let SeraCare GPS help you navigate to the patient samples you need

GPS Program—Publications and Services

- THE SAMPLE BUGLE—GPS Monthly New Sample Bulletin
 - Monthly email of new samples meeting the test parameters you specify
 - Contact us for your free subscription
- GPS Sample Accumulation and Storage Service
 - SeraCare will locate and collect samples to your specs, then store in a state of the art biobank until needed
- GPS Automatic Sample Subscription Service
 - Regular delivery of the samples you request, as they become available

GPS Program—Sample Sources, Specs, Limitations

SeraCare is partnered with the world's largest reference laboratories, organizations with decades of experience performing thousands of tests per day

Samples are remnants from a diverse, global patient population, anonymized, and available for distribution and sale by SeraCare under exclusive licensing arrangements

- Sample volumes are fixed—sample vials not meeting the minimum volume may be replaced with equivalent
- Samples are single test, single result—available characterizations are analyte, age, and gender
- Samples are untested for other analytes, diagnosis is unconfirmed
- Clinical data are not available for prescreening samples

SeraCare GPS program is supported by our knowledgeable scientists, best in class customer service, and more than 15 years of experience serving research labs and IVD manufacturers worldwide

Related SeraCare Products and Services

- Bulk Characterized Disease State Materials—donor traceable, with custom processing available
- Sample management and testing services, clinical trial support
- AccuCell™ Cryopreserved PBMCs, PBMC subsets
